Lennox innovation at work
Product Announcement

Lennox MPA Ductless Mini-Split Systems Now Available

Year-Round Comfort and Performance

Lennox is pleased to announce the introduction of a full line of advanced MPA Heat Pump Mini-Split Systems. The MPA Heat Pump Mini-Split Systems offer substantial advantages over other types of heating and cooling.

- **ENERGY SMART**
  - Variable speed inverter technology lowers energy costs
  - Efficiencies up to 23.5 SEER and 10.5 HSPF
- **APPLICATION FLEXIBILITY**
  - Optimal when ducted options are not feasible
  - Wide range of sizes and selection of indoor wall-mounted, cassette, ducted and ceiling/floor models
    - Single zone and multi-zone applications
    - Units controlled separately in each zone
  - Long line lengths from outdoor unit to indoor unit
- **WHISPER-QUIET OPERATION**
  - As quiet as 29 dBA
- **LOW AMBIENT PERFORMANCE**
  - Operation down to -13F heating and 5F cooling

PRODUCT OVERVIEW

- High efficiency ductless solutions
- Multi-zone systems support up to five zones
  - Mix and match indoor model types
- Modern design wall-mounted panel
- Feature rich wall-mounted unit includes
  - Follow me
  - Turbo mode
  - Quiet design
  - Low charge detection
  - Intelligent defrost
  - Two-way drain connection
  - Auto restart
- Voltages: 115V, 208/230V
- Easy installation and maintenance
  - Outdoor unit provides power to indoor units (no additional wiring)
- Complements the Lennox line of VRF products
- Warranty:
  - 7 years on compressor
  - 5 years on covered parts

PRODUCT AVAILABILITY & LEAD TIME

- Availability: April 20, 2016
- Lead time: 3 days
