Comfort and reliability you can really cozy up to.

Whether it's the coldest day of winter or just a chilly autumn afternoon, you can depend on the Lennox® GWB8-E boiler for energy-saving warmth and comfort. Constructed of high-quality materials, including a cast iron heat exchanger and stainless steel burners, the GWB8-E delivers reliable heating performance season after season, year after year.

Save money while staying perfectly warm

With efficiency ratings of up to 83.9% AFUE, the GWB8-E offers significant energy savings compared to an older, less efficient boiler. That means you'll see lower utility bills throughout the winter, even without adjusting your thermostat.

Put to the performance test

Each unit is thoroughly tested and inspected before leaving the factory to ensure years of reliable operation. A 20-year limited warranty on the heat exchanger and a 5-year limited warranty on covered parts** provide additional peace of mind.

Customizable to fit your home and needs

The GWB8-E is available in nine different sizes for easy integration with any existing radiator or underfloor heating system. And with your choice of natural or LP gas,* the GWB8-E provides incredible versatility.

Quality and innovation you can rely on

Each feature of the GWB8-E boiler is designed to provide efficient, dependable heating for many years to come.

- **Vent Damper** – Automatically closes when the boiler turns off to maintain energy efficiency.
- **Cast Iron Heat Exchanger** – Designed for years of long-lasting reliability over a range of water flow rates.
- **Thick Fiberglass Insulation** – Minimizes heat and energy loss when the heat exchanger cools down after a cycle.
- **Stainless Steel Burners** – Provide greater resistance to corrosion and oxidation.***
- **Electronic Ignition Control** – Monitors water temperature and maximizes efficiency by turning on the burner only when needed.
- **Low-Water Cut-Off** – Provides protection against potentially dangerous low water conditions.****

*Shipped as natural gas. Convertible to LP.

**Covered components may be eligible to receive a 10-year limited warranty. Online equipment registration at www.lennoxregistration.com is required within 60 days of installation (except in California and Quebec) or Lennox' base warranty will apply. Applies to residential applications only. See actual warranty certificate for details.

***262 and 299 models feature titanium burners.

****Available on select models. Ask your Lennox Dealer for details.
