

NEW EXPANDED OFFERING

INTRODUCING THE COMPLETE LINE OF RAIDER® PACKAGED ROOFTOP UNITS

RAIDER®
Value Without Compromise®

THE RAIDER REPLACEMENT LINEUP—FOR THE INDUSTRY'S MOST COMMON FOOTPRINT.

With the addition of the new 6-ton packaged heat pump unit, the Raider® rooftop product line has expanded to offer a full range of quality replacement products. Each unit has been carefully crafted to deliver quality and convenience, ensuring a compatible and reliable option that is ready when you need it. Compatible with over 20 years of popular industry curb sizes, Raider is the smart fit for all of your rooftop replacement needs.

LENNOX® COMMERCIAL RAIDER® PACKAGED ROOFTOP LINE

VALUE WITHOUT COMPROMISE.

With the expansion of the Raider rooftop unit line, Lennox delivers value and convenience without compromising on quality. Built in Lennox' award-winning factory, every unit is thoroughly tested for reliable performance with a 200-point quality check. Raider is designed to be compatible with many replacement installations and fit with one of the most popular curb sizes currently in use. And best of all, it's available when you need it.

Leading the Industry

Lennox® Commercial distribution facilities across the country have Raider rooftop units ready for same day or next-day shipping to most of the U.S. and Canada. Additionally, the Rapid Replacement emergency replacement program is a consistent and reliable resource that comes through every time with quality equipment, exceptional speed and easy ordering.

Features that Save Energy and Cost

Raider units with multi-stage air volume (MSAV) technology deliver fan power savings of up to 61% and are up to 27% more efficient** than standard systems.

Installation and Service Made Simple

Utilizing the most popular footprints in the light commercial industry eliminates the need for an adaptor curb, allowing for an easier installation and savings of up to \$1,500 per unit*.

Rebate Eligibility and Government Compliance

Raider units equipped with MSAV exceed ASHRAE 90.1 2013 standards and are qualified up to CEE Tier II utility rebates and energy incentives. And the available factory- or field-installed high-performance economizer meets Title 24 requirements.

Technologies that Get the Job Done

Standard Environ™ Coil System uses up to 52% less refrigerant, is up to 59% lighter and has up to 20% fewer brazed joints than typical rooftop units.

Improved Comfort and Control

Simple, intuitive thermostats are available with all Raider rooftop units. You also have the option of integrating units with building automation systems using BACnet or LonWorks.

*\$1,500 savings is calculated in replacement jobs where the Raider unit matches the footprint, eliminating the need for an adaptor curb, any plumbing, electrical and/or structural engineering costs.

**At 67% airflow when compared to full load.
