

Lennox iComfort S30/E30 Trainer

Troubleshooting guide

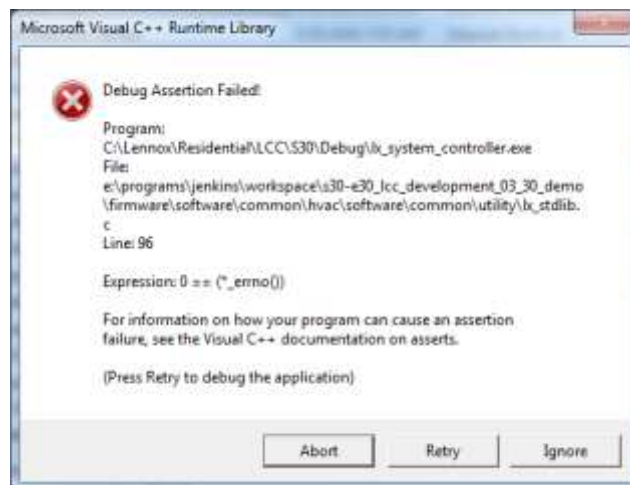

Troubleshooting Tips

Error Message: iComfort cannot communicate with the equipment

Programs running in the background with higher than normal disk access (backup programs, virus scans, etc) will cause this error message to occur. To recover from this issue, close any background programs, then close and the restart the MEmu program (see Step 1 under **Run the HD Emulation**).

Error Message: Debug Assertion Failed!

This error message occurs when two or more copies of the S30 or the E30 emulation programs have been started. To recover from this issue, close all copies of the emulation programs and start over.
