

The Ultimate System for Perfect Air.

Presenting the Ultimate Comfort System.

Combining the very best of the Dave Lennox *Signature*® Collection, the Ultimate Comfort System is the very top of top-tier, offering unprecedented whole-home system comfort that's perfectly tuned to your home. From the moment it's installed, this fully communicating system seamlessly works together to deliver clean, perfect air and maintain optimal performance. This is nothing short of the most advanced, efficient and capable heating and air conditioning system the world has ever seen. This is perfect air fully realized.

LENNOX Air is life. Make it perfect.™

- 1 PureAir™ S Air Purification System
- 2 Lennox Smart Zoning System
- 3 Lennox S40 Smart Thermostat
- 4 SL28XCV Air Conditioner / SL25XPV Heat Pump
- 5 SLP99V Gas Furnace

When everything is perfect, you can feel it.

Forget temperature swings and having the weather dictate humidity. This variable-capacity system is in constant communication with itself to deliver clean, perfect air and maintain your home's ideal temperature and humidity level with pinpoint precision. Period. And with the Lennox Smart Zoning System, you can optimize and personalize your air throughout different sections of your home. That way, the only way your air feels is how you want it to feel.

Beyond quiet operation.

Hear that? Of course you didn't. Even with all of its impressive power, this system has been engineered to drastically minimize sound output to seamlessly operate at a noise level that is, quite simply, unheard of.

The ultimate in safe, healthy, whole-home air purification.

The PureAir™ S system offers hospital-grade³ filtration featuring the Lennox Healthy Climate™ Carbon Clean 16® air filter that removes over 99% of the virus that causes COVID-19¹ from the air², as well as even smaller viruses, bacteria, and fungal spores. Also, unlike other purification systems, it produces zero lung-irritating ozone and actively removes existing ozone found in the home⁴. And its filter features a design that ensures the least airflow resistance⁵ for unmatched efficiency and consistently clean, perfect air.

Meet the most efficient system ever.

More efficient than anything the industry has ever seen, this system includes a standard-setting furnace that boasts an efficiency rating up to 99%—that means it essentially converts every last bit of energy it uses into heating and cooling the home — and an air conditioner that achieves an efficiency rating of up to 28 SEER. Best of all, the energy saved is as healthy for your wallet as it is for the environment.

Welcome to your home comfort command center.

Unlike most smart thermostats, the Lennox S40 Smart Thermostat is more than a temperature regulator. It's the command center for your entire system, with the incredible ability to monitor sensors throughout your home and in all your equipment. From detecting air pollutants and customizing comfort by room to providing maintenance and service reminders, it will even automatically alert you if your system goes out of tune and allow you to remotely share diagnostics with your local Lennox dealer. The Lennox S40 Smart Thermostat not only provides the most precise and perfect air, it also gives peace of mind.

1. Removal efficiency based on third party testing results using MS-2 bacteriophage (ATCC 15597-B1). Bacteria representative of virus-sized particles like SARS-CoV-2, the virus that causes COVID-19. November 2020.
 2. When used properly with other best practices recommended by CDC and others, filtration can be part of a plan to reduce the potential for airborne transmission of COVID-19 indoors.
 3. Not intended for actual hospital use. Based on Application Guidelines, Table 1, ASHRAE Application Handbook, 2011.
 4. Based on ozone removal testing conducted by third party testing results. May 2018.
 5. Based on competitive benchmarking of MERV 16 filters, Healthy Climate® filters have the lowest air flow restriction. Greater restriction of air flow creates a greater load on an HVAC unit's fan motor, increasing energy consumption.
